

Advanced,
visual, flexible
makeready.

Save time on complex document preparation.

Fiery® JobMaster™, a key product of the Fiery Workflow Suite, provides advanced PDF-based job preparation functions. Print operators will be more productive when performing makeready tasks with complex documents. Intuitive document assembly includes fully visual tab insertion and design, media assignment, advanced page numbering, finishing, scanning, and powerful late-stage editing features.

With Fiery JobMaster, you'll be able to:

- Produce error-free, higher-margin jobs such as catalogs, manuals, proposals, reports, and books.
- Speed up job preparation using a flexible and integrated solution.
- Reduce waste and save time with interactive and fully visual job previews.

Easy to use

Fiery JobMaster launches from the Fiery Command WorkStation® user interface to provide unsurpassed flexibility and ease of use:

Flexible

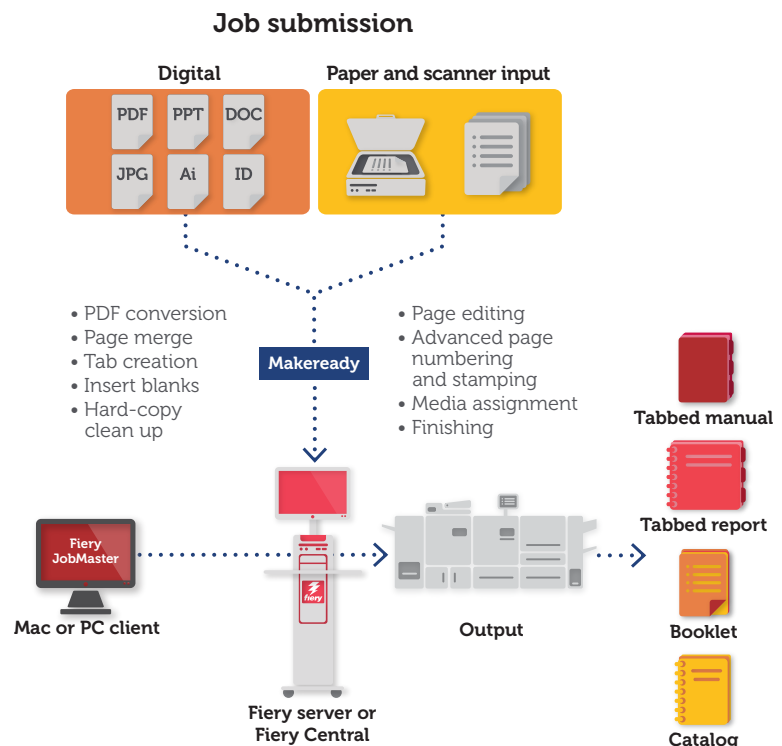

JobMaster can run on a PC or Mac® client, or locally on the Fiery server.

Intuitive

Built with the familiar Fiery user interface, operators can be up and running quickly, producing high-value jobs.

Easy to deploy

JobMaster is easy to maintain and access since you don't need to install it on a separate server — it runs anywhere Fiery Command WorkStation does.

Flexible architecture allows you to perform makeready tasks from a client or locally at the Fiery or Fiery Central server.

What JobMaster does

Displays visual preview of all job settings

JobMaster previews jobs in page and sheet views, displaying media attributes at a glance for quick job navigation.

Provides advanced tab creation

The preview changes dynamically as users specify tab ear settings and content that can include images, color background, and text. Users can easily insert multi-bank or bleed-edge tabs for more complex, higher-profit documents. In addition, Auto Tabs feature takes advantage of bookmark links in PDF files to automate the tab creation process.

Integrates and cleans up hard-copy pages

Users can de-skew and de-speckle scanned documents; edit images for brightness, contrast, and sharpness; make pages fit the desired media size for a uniform appearance on every page; and mask out staples, hole-punch marks, or page content.

Converts to grayscale

Easily specify any page or sheet surface to print in black and white and save on click charges while honoring the designer's intent for the printed piece.

Allows editing of selected pages

Operators can redefine crop and trim box sizes and mask unwanted content such as pre-existing page numbers. Edits are non-destructive and can be removed or modified any time before production.

Applies page numbering and stamping

Apply unique numbering sequences for one or multiple page sections using custom text, formats, and macros anywhere on the page. Skip page numbers for inserts and tabs, and store new page-number templates to speed up future jobs.

Provides drag-and-drop page merge

Create a new job by merging digital and scanned documents. Delete and move pages, or add blank and duplicate pages.

Includes Adobe® Acrobat® Pro and Enfocus PitStop Edit

Make last-minute changes to document content without returning the file to customers. Or do last-minute text, spot-color, or image changes in PDF documents.

Specifications

Support and maintenance

With a support and maintenance agreement, you get the latest updates and upgrades online. You can also access EFI™ technical support by phone, email, and on the Fiery JobMaster User Forum.

Software included with Fiery JobMaster

- Adobe Acrobat Pro for Windows® and Mac
- Enfocus Pitstop Edit for Windows and Mac

Minimum system requirements for client workstation

Fiery Command WorkStation 5.4.1 or above

Mac OS® client

- Processor: Intel® Multi-Core processor
- Mac OS X 10.6, 10.7, 10.8, 10.9, and 10.10
- 1 GB of RAM or more recommended
- 2 GB of available hard drive space
- 1024x768 display with 16-bit video card

Windows client

- Processor: Pentium 4, 1 GHz or faster processor
- Microsoft® Windows XP, Windows Vista®, and Windows 7, 8, and 8.1
- 1 GB or more of RAM
- 2 GB of available hard drive space
- 1024x768 display with 16-bit video card

Supported printers
